

Afia Noor

Date of birth: 12/12/2002 | **Nationality:** Pakistani | **Gender:** Female | **Phone number:** (+92) 3144926911 (Mobile) | **Email address:** afianoor508@gmail.com | **Address:** Saddique Abad, Satellite Town, 35200, Jhang, Pakistan (Home)

ABOUT ME

I am Afia Noor, a Computer Science graduate with a strong foundation in programming, software development, and machine learning. Throughout my studies, I have gained hands-on experience in Python, TensorFlow, Keras, C++, HTML, CSS, and JavaScript, allowing me to work across both software engineering and web development domains. I am passionate about applying my technical skills to solve real-world problems, with a particular interest in artificial intelligence, data-driven solutions, and innovative software projects. Motivated, quick to learn, and adaptable, I am eager to contribute to challenging roles that foster both personal and professional growth.

EDUCATION AND TRAINING

08/03/2019 – 15/08/2021 Jhang, Pakistan
ICS (INTERMEDIATE IN COMPUTER SCIENCE) Govt. Graduate College for Women Satellite Town Jhang

Website <https://ggcwstjhang.com/> | **Level in EQF** EQF level 4

10/10/2021 – 11/09/2025 Jhang, Pakistan
BACHELOR OF COMPUTER SCIENCE University of Jhang

Website <https://www.uoj.edu.pk/> | **Level in EQF** EQF level 6

LANGUAGE SKILLS

Mother tongue(s): **URDU**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C1	C2	C1	C1	C2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

SKILLS

Microsoft Office | Python (computer programming) | C++ | javaScript | HTML | Basic Data Analysis | TensorFlow | Keras | CSS

PROJECTS

08/04/2025 – 08/07/2025
Brain tumor Detection and Classification

- Using machine learning and deep learning techniques
- Classification of Glioma, Meningioma, and Pituitary tumors
- Implementation with Python, TensorFlow/Keras
- Model optimized using HHO (Harris Hawks Optimization)

25/08/2025 – 25/09/2025
Ai Customer Support System

AI Customer Support System is a demo web application built using Python and Flask that processes customer messages in real time. The system classifies each message into categories such as Complaint, Refund/Return, Sales Inquiry, Delivery Question, Account/Technical Issue, General Query, or Spam, performs sentiment analysis (Positive,

Neutral, Negative), and generates a short professional auto-reply. This project demonstrates the practical use of Natural Language Processing and AI concepts for basic customer support automation.

10/09/2025 – 10/09/2025

Event Finder Web Page

Developed a fully responsive EventFinder featured events webpage that displays upcoming local events in a clean, mobile-friendly layout. The project uses HTML5, CSS3, and Vanilla JavaScript to dynamically render event data, provide real-time search filtering, and present individual event detail pages, ensuring a modern UI/UX across mobile, tablet, and desktop devices.

15/10/2025 – 15/11/2025

Ghost Writer

Ghost Writer AI is a professional-grade writing assistant that utilizes the lightning-fast inference of Llama 3.3 models via Groq to provide seamless, real-time script and story completions. Unlike traditional LLM interfaces, this application focuses on style-matching and multilingual versatility, allowing it to automatically detect and respond in English, Urdu, Arabic, or Roman Urdu while maintaining the user's unique creative voice. By combining a distraction-free glassmorphic UI with advanced system prompting, the project serves as an intuitive brainstorming partner that bridges the gap between human intent and AI-generated content, making it an essential tool for creators looking to overcome writer's block across different cultures and languages.

03/11/2025 – 03/12/2025

Language Translator app

This Language Translator app is a sophisticated communication bridge that utilizes Neural Machine Translation (NMT) to provide instant, context-aware conversions between dozens of global languages. By leveraging advanced deep learning models, the application goes beyond literal word-for-word substitution to understand intent, grammar, and cultural nuance, ensuring that the translated output feels natural and accurate. Designed with a user-centric interface, it empowers travelers, students, and professionals to break down linguistic barriers in real-time, whether through text input, voice recognition, or document scanning.

01/12/2025 – 31/12/2025

Personal Portfolio app

Designed and deployed a modern, responsive portfolio website to present my developer journey, real-world projects, technical skills, and certifications. Built with HTML, CSS, and JavaScript and hosted publicly for easy access and professional visibility.

15/01/2025 – 15/02/2025

Vault legacy app

Vault Legacy is a modern mobile application built using the Next.js framework and Capacitor, designed to provide a secure environment for users to manage and protect their data. The app leverages Supabase as its backend database, ensuring robust data handling and real-time synchronization. Developed with TypeScript and Tailwind CSS, the project features a professional, responsive user interface that is optimized for mobile performance. By utilizing Capacitor, the web-based codebase is seamlessly integrated into a native Android platform, delivering a high-quality, fully functional mobile app experience.

● CREATIVE WORKS

11/08/2023 – 06/11/2023

Facebook Clone Application

- Write here the description...Designed and developed a desktop-based social media application inspired by Facebook.
- Implemented the **frontend** using **HTML** and **CSS** to create a user-friendly and responsive interface.
- Built the **backend** in **Java**, managing user authentication, data storage, and interactions between users.
- Key features included: user registration/login system, posting updates, adding friends, and viewing profiles.
- Focused on integrating both frontend and backend seamlessly to simulate a real-world social networking platform.
- Gained practical experience in **full-stack development**, problem-solving, and handling complex application workflows.

11/03/2024 – 11/04/2024

Hangman Game

Hangman is a classic word-guessing game where one player thinks of a word and the other tries to guess it by suggesting letters within a certain number of attempts. Each incorrect guess results in drawing a part of a gallows and a hanging figure, symbolizing the player's remaining lives. The goal is to uncover the full word before the drawing is completed, making it a popular exercise for improving vocabulary and spelling skills.

● ONLINE COURSES

10/07/2025 – 29/07/2025

Google AI Essentials (Coursera)

- Completed an online certification focused on the fundamentals and applications of Artificial Intelligence.
- Learned the **Introduction to AI** and its real-world use cases.
- Gained practical knowledge on **maximizing productivity with AI tools** for work and study.
- Explored the **art of effective prompting** to generate accurate and useful AI outputs.
- Understood key principles of **using AI responsibly**, including ethics and bias awareness.
- Developed strategies to **stay ahead of the AI curve** by adapting to evolving technologies.

15/08/2025 – 25/09/2025

Google Data Analytics

Google Data Analytics Professional Certificate (Coursera)

Completed an 8-course program developed by Google covering the end-to-end data analysis process, including data cleaning, preparation, analysis, visualization, and communication of insights. Gained hands-on experience with spreadsheets, SQL, Tableau, and R, and completed a capstone project applying real-world analytical techniques to solve business problems. Write here the description...

02/09/2025 – 16/09/2025

Google Project Management

Google Project Management Professional Certificate (Coursera)

Completed a beginner-level, 7-course program developed by Google that covers the full project management lifecycle including initiation, planning, execution, Agile/Scrum methodologies, risk & stakeholder management, quality control, and project closure. Gained hands-on experience in creating project documentation, communication plans, and using project-management tools; includes a capstone project to apply all stages in a simulated real-world scenario.

10/10/2025 – 10/12/2025

Aspire Leaders Program (Aspire Institute)

The Aspire Leaders Program is a prestigious, fully funded leadership development initiative founded by Harvard Business School professors to empower first-generation university students and recent graduates from low-income backgrounds. The program offers a multi-stage journey that includes professional development tools, such as Harvard-curated self-assessments and resume-building resources, alongside access to a global community of peers from over 150 countries. Participants engage in interactive masterclasses led by world-class faculty, covering topics like artificial intelligence, digital transformation, and social impact. Upon completion, "Aspire Leaders" gain access to exclusive mentorship, internship opportunities, and the chance to apply for seed funding to launch their own community-driven projects.

● WORK EXPERIENCE

AI ENGINEER – CODECELIX – 15/01/2026 – 15/03/2026 – JHANG, PAKISTAN

I am currently serving as an **Intern – AI Engineer** at **CodeCelix**. This three-month remote internship, which commenced on **January 17, 2026**, involves working as part of the AI Engineer Team to develop intelligent solutions and contribute to real-world projects. My responsibilities include executing domain-specific tasks in AI development and research while collaborating with experienced mentors in a fast-paced environment. Through this role, I am gaining

hands-on exposure to modern AI tools, frameworks, and methodologies, with a strong focus on strengthening both my technical and problem-solving skills.
